

Autism Spectrum Disorder (ASD) Assessment

This Gold Standard testing will provide the diagnostic assessment for Autism Spectrum Disorder and Pervasive Developmental Disorder. The complexity of assessment that may be required (standard or complex) will be determined by your Psychologist in the initial assessment hour.

For the majority of ASD Assessments (standard) we will conduct:

- Autism Diagnostic Screeners
- IQ Assessment
- Academic Assessment (if required)

For complex ASD Assessments; we will conduct:

- IQ Assessment
- Autism Diagnostic Screeners
- Autism Diagnostic Assessment with the Child
- Autism Diagnostic Interview with the Parents

Ages Assessed:

- 2 – 18 yrs (children)
- 18 yrs + (adults)

Length of time required to complete the assessment:

Standard Assessments:

- 1 hour initial assessment
- 3 hours of testing
- 1 hour feedback session with Parents where applicable 6 weeks after initial testing

Complex Cases

- 1 hour initial assessment
- 2 hour of assessment for the ADI (with Parent)
- 2 hour of assessment for the ADOS (with the child)
- 5th hour of assessment to be advised by the Psychologist, if needed
